

COVID-19: Letter from XRA President

April 15, 2020

Dear Doctors, Staff and Patients,

The COVID-19 pandemic has created uncertainty across the globe. During these unprecedented times, the health and well-being of all our employees, referring physicians, patients, and their families is our top priority. We remain in constant conversation with local governments and public health authorities and have been follow their directives closely to erase this pandemic. (MOHLTC, PHO, OAR, CMRITO)

This past month has been rather unusual to say the least. Our local hospitals have approached us to service their patients. We have changed our hours and staffing and will continue to keep the clinics open for ultrasound and x-ray. There are many illnesses that are non Covid related and patients need a safe place to be imaged. We are now open Monday – Friday 8-4pm.

We are screening patients at booking and upon entry to the clinics. All staff are wearing masks. Glass partitions are now at each reception.

In these most challenging and unusual times, we remain thankful for your support for all the years that we've been working together. We remain completely focused on delivering safe and seamless imaging services for all your essential patients.

We are grateful for the collaboration of fellow clinics in obtaining PPE and other supplies.

Please feel free to contact us if you have any questions.

Please stay safe as we are all in this together!

Best Regards,

Dr. Brian Yeung, President
